

Step by Step

- Problems in Imperative
- 1. complex environment me fail ho jata hai
 - 2. No State Management - Kie hue kaam ka koi hisab hi nahi hai..
 - 3. Modules bdia se kaam nahi karte..
 - 4. Issues in readabilty and maintenance.

Aap ek file banao aur declare kardo ki kya chahiye hai... kitne resource group chahiye, kitne storage account chahiye, uske baad ka kaam terraform sambhal lega

- Windows
- 1. Right click -> new file
 - 2. Notepad, notepad++
 - 3. requirement declare denge

- Linux
- 1. touch = new file
 - 2. nano = to write content

Koi na koi language chahiye..

HCL = Hashicorp Language...
terraform bolta hai mujhe .tf smjh aati hai...

Terraform samjhata hai

Requirement = Terraform(IAC Tool) ke through 4 resource group kaise banaenge.. azure pr

- Pre-Requisites
- 1. Install Terraform ✓✓
 - 2. Azure Subscription + Contributor Access ✓✓
 - 3. Notepad, Notepad++, VSCode ✓✓
 - 4. Document Search karne ka tarika.
like in az cli we did az --help

- Step 1- Create a new dhondhu.tf file.
- Step 2- Get code from Gyan ka sagar - **terraform registry**
- Step3- terraform ko Init and apply kardenge

Grouping zinda karna hai...

GUI Tools exe

CLI Tool Exe

Mujhe .txt smjh nahi aata... bs .tf hi aata hai..
Mujhe bhojpuri bhi nahi aati... bs HCL language aati hai...
